

Multiguard Connect™

Hosted Security Management for Business

TOTALLY CONNECTED

Connect to and manage all of your locations through a single web portal regardless of physical location.

REPORTING CAPABILITY

Automatic delivery of customized reports that provide meaningful information to your business.

COST EFFECTIVE

Leverage Multiguard Connect to consolidate alarm & access control system management to a single platform.

MOBILE CONNECTIVITY

Access your security management interface from any web enabled device to perform Arm, Disarm, Unlock, and Lock Down functions.

NOTIFICATIONS

Create custom email and text message notifications for critical events.

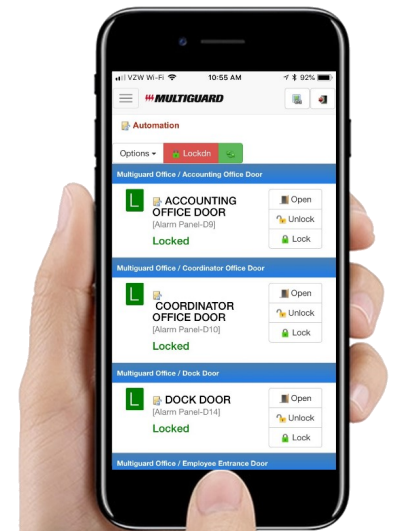

Multiguard Connect™ is the premier hosted security management platform that enables businesses to effortlessly manage Alarm and Access Control Systems regardless of number of systems, doors, or physical locations.

Whether it's one or one thousand locations, you now have the convenience to control, view, and interact with all of your Alarm and Access Control Systems in real time and from any web-enabled device.

Product Features

- Monitor alarm and access control activity
- Add/Delete user codes/cards effortlessly
- User based system design, allows for a single user to be assigned to access at multiple locations.
- Arm/Disarm security systems with ease
- Remote system lockdown
- Utilize access cards for alarm and door access
- No software to maintain or purchase
- Automatic feature enhancements and database backup.

- **Manage Access Codes & Permissions:** Quickly add users into the Multiguard Connect database for alarm and access control privileges eliminating redundant data entry processes.
- **Instant Notifications:** Create custom event notifications to be displayed on-screen or sent instantly via e-mail or text messaging.
- **Integrated Platform:** Combines alarm and access control system functions into a single platform.
